

*A Naming Opportunity*

## **The Medical Library at the University of Haifa School of Medicine**

*A Legacy of Knowledge for Generations of Future Physicians*

In an age of rapid technological advancements, evolving educational models, and cutting-edge clinical practices, medical libraries have become crucial knowledge hubs and innovation centers. The Medical Library at the University of Haifa School of Medicine will exemplify this transformation, serving as a dynamic space where information will not merely be stored, but actively accessed, utilized, and shared.

**A Center for Innovation and Learning:** Designed to be the intellectual heart of our School of Medicine, the Medical Library will be a vibrant center, rich with knowledge and resources. It will provide students, faculty, and researchers with access to up-to-date resources in clinical medicine, biomedicine, and public health, fostering a culture of lifelong learning and professional development. With a rich collection of both print and digital resources, the library will serve as the cornerstone of medical education and research at the University of Haifa.

*"Our new medical library will play a pivotal role in shaping the future of healthcare by nurturing the minds of new physicians. With your generous support, we can furnish our students, faculty, and researchers with unparalleled resources to pioneer innovations and refine healthcare practices. Your commitment will ensure that the education of new physicians is rich, comprehensive, and transformative."*

— President Gur Alroey

## Essential Resources at the Medical Library

*Our Medical Library will offer access to a diverse collection of medical literature, including textbooks, journals, databases, and multimedia resources.*

**Digital Resources:** A vast collection of online databases, e-journals, and e-books accessible 24/7 to support research and academic endeavors remotely.

**Physical Collections:** A carefully curated selection of print materials, including textbooks, reference works, and historical archives, complementing the digital resources.

**Innovative Technologies.** We will integrate emerging technologies such as virtual reality (VR) simulations, augmented reality (AR) applications,

AI-powered diagnostic tools, and data visualization tools to enhance medical education and research.

**Information Specialists.** An expert library staff will offer personalized assistance, research consultations, and specialized training workshops on information literacy and research methodologies.

**Modern Facilities.** The Library will include collaborative learning spaces for interactive study, individual study spaces, and small group study spaces to accommodate active learning styles and interdisciplinary team collaboration.

## Join us in investing in the future of healthcare at the University of Haifa

### FOR YOUR CONSIDERATION

A generous gift of **\$3 million** will enable the University of Haifa to dedicate the Medical Library in your name or in the name of a loved one. A prominent plaque at the entrance to the library will recognize your support. We will feature the library's name on the School of Medicine website and all promotional materials, ensuring your lasting legacy.
