

Making a Difference

Supporting Student Scholarships for Women in Higher Education

Give the gift of scholarships

The University of Haifa is committed to promoting gender equality and empowering women in higher education. Women's empowerment expands economic growth, promotes social development, strengthens family life and is vital to the realization of a prosperous future.

As an institution of higher learning that has a longstanding commitment to equality and diversity, we are proud that women comprise between 60-70% of our undergraduate, graduate and doctoral degree programs. Our diverse student body, a mirror of the full spectrum of Israeli society, is a valuable asset to the University, the city of Haifa and the entire northern region of Israel. Many of our students come from underrepresented Israeli populations and need our valuable support to thrive and improve their socio-economic prospects.

Student scholarships are the most valuable gift we can provide—the ultimate means for social mobility, for a vibrant and dynamic society. These scholarships will help young women realize their dreams and pursue careers in fields such as STEM, computer science, information systems, education, and psychology.

Serving as an Agent of Change

“As the first Israeli university to align its educational mission with the United Nation’s 17 Sustainable Development Goals, the University of Haifa takes very seriously the need to advance Gender Equality (SDG #5). We have established **The Diversity, Equity and Equality Unit** to ensure that our campus community is a model for equality, inclusivity and safety. “

-President Gur Alroey

MEET ONE OF OUR STUDENTS

Ravit Avram (Department of Special Education) has been working with children with autism spectrum disorder for over twenty years. She is currently a PhD candidate and supervises a team of Special Ed teachers in the integration process of students with ASD into the regular education system.

“Our research is helping Special Ed teachers expand their teaching and assessment ‘toolkit’, improve their abilities to meet their students’ diverse learning needs, and assist their students to enter into the workforce as independent adults. We are making a difference in the lives of ASD learners.”
