

Academic Year 2025-26

Making a Difference

Supporting Student Scholarships for Women in Higher Education

Give the gift of scholarship

The University of Haifa is deeply committed to advancing gender equality and empowering women through higher education. We believe that investing in women's education fuels economic growth, strengthens families, and is essential to building a more prosperous and resilient society.

As an institution with a longstanding commitment to equality and diversity, we are proud that women comprise between 60-70% of our undergraduate, graduate, and doctoral students. Our campus reflects the full spectrum of Israeli society. While this diversity is a vital asset to the University and the Haifa region, it also brings a profound responsibility. Many of our students come from underrepresented populations and face significant financial barriers. Scholarships bridge this gap, allowing them to thrive and transform their socio-economic futures.

Student scholarships are the most powerful investments we can provide — a proven driver of social mobility and a foundation for an inclusive society. These scholarships empower young women to pursue their academic ambitions and prepare for meaningful careers in high-demand fields such as computer science, information systems, marine sciences, nursing, education, and psychology.

Serving as an Agent of Change

“As the first university in Israel to align with the United Nations’ Sustainable Development Goals, the University of Haifa is a global leader in Gender Equity—**currently ranked #26 worldwide***. Our Equity and Inclusion Commission leads this effort, ensuring that inclusive practices are central to our teaching, research, and campus life.”

- **President Gur Alroey**

*Ranked #26 worldwide in Gender Equality (SDG 5), *Times Higher Education Impact Rankings 2025*.

MEET ONE OF OUR STUDENTS

Renad Jabarin, PhD Candidate

The Lab for Neurobiology of Social Behavior

My name is Renad Jabarin. I am a 29-year-old first-generation university graduate from the village of Zalafa. Over the past eight years, I earned my bachelor's and master's degrees at the University of Haifa and am now completing my PhD in Prof. Shlomo Wagner's Lab for Neurobiology of Social Behavior. My research investigates how neurons in the prefrontal cortex, a brain region associated with social behavior and emotions, respond to social cues. With five published papers and a sixth forthcoming, I am deeply grateful for the support and opportunities provided by the University of Haifa.

Bachelor's Scholarship

\$15,000 supports a BSc degree

\$5,000 / year

Graduate Scholarship

\$40,000 supports a 2-year MSc degree

\$20,000 / year

PhD Fellowship for living expenses

\$120,000 supports a 4-year doctoral degree

\$30,000 / year
